

UBEC 1AT:

AUTO TANK Control Module

TankVision Display Module

Pressure Sensor

The UBEC 1AT is an automatic tank fill controller for use with the Unibody E3F Electric valve. Four push buttons allow the operator to select the mode of tank control – manual or automatic. The complete AUTO TANK system includes the AUTO TANK control module, the TankVision display module, and the pressure sensor. This complete system controls water flow at any GPM, while maintaining tank water volume between 50 and 95% full for tanks over a 500 gallon capacity. It also has a calibrating procedure that allows it to be used on irregular shape tanks.

MODEL	UBEC 1AT (50/95)
Part number	08899155
Enclosure	Aluminum
Enclosure rating	NEMA 6
Operating voltage	11-30 VDC
Tank Volume Display	9 Segment LED Gauge
Operation	Manual or Automatic
CAN J1939 Compatible	Yes
Tank Size	Tanks over 500 gallons
